### EXPERIENCE

#### **World Prints**

#### **Front End Developer**

Remote

Oct. 2021 - Current

- Implemented user authorization using role-based routing, filtering, and mapping.
- Developed user authentication token manually using document.cookie.
- Designed responsive UI for contact us page splash page, and sidebar using React.
- Developed and integrated reusable functional components to the existing codebase.
- Created dynamic web pages utilizing third-party libraries including Yup, Formik, and Reactstrap that enhance the overall user experience.
- Worked with an agile team that consisted of daily stand-ups, sprints, Team Foundation Version Control, and sprint retrospective meetings with product owners.
- Collaborated with team members for code reviews and merged pull requests to provide and receive purposeful feedback to optimize the functionality of the software via Git and Github.
- Debugged application using Chrome developer tools and Visual Studio Debugger.
